PROJECTS

Masterpav RJ500 Rejuvenate is a two component polymer modified cementitious coating used to resurface concrete. It is specially design for applications by roller or pump-sprayer for rejuvenate existing stamped concrete surface or plain concrete. The **original stamped pattern is not affected** by the rejuvenate materials.

Masterpav DF400 Concrete Stain is a specially formulated non-reactive semi-transparent stain that will penetrate and colour most porous concrete surfaces. It can be mixed in water, acetone, or denatured alcohol. It is ideal for exterior use as it is UV protected and will not fade in the sun. It is packaged as a liquid concentrate. Mottled looks similar to acid stain applications can be accomplished with application techniques. Ideal for exterior floor, interior floor, driveways, walkways, counter top, stucco wall, old and new stamped concrete.

A proven system that livens up your concrete slab works! Not only it can give a stone slate-like effect to your concrete, it also comes in many different colours, textures and patterns.

The patterns are imprinted onto the concrete* and the finished surfaces are then sealed with two coats of sealer, giving your stamped surfaces a brighter look and easy maintenance.

*The concrete base for stamped concrete works may require a different mix from normal concrete specification. Ideal for driveways, car parks, walkways, shopping centre, pool surrounds & courtyards.
